

## Member Comments

Paul Lavelly 1-03-01

Where are member comments (such as mine) available for review?

Lab Response: Task Force member comments have been added to the end of meeting transcripts.

Paul Lavelly 1-3-01

I noted that the transcript that was delivered as a hard copy and the one on the web site are not identical. Which should be used as the "official" transcript so that page and line numbering and comments will be consistent?

Why are there two versions of the transcript?

Lab Response:

Subject: Inquiries

Duffy & Dougherty LLC <duffndough@aol.com>,

Ginny Lackner <RELackner@lbl.gov>

I have received three inquiries from you on January 3, 2001. Below are my responses to these inquiries:

### **1. Transcript**

You inquired about the designation of the Nov. 16, 2000, Task Force transcript "official version" and noted the difference between the hard copy and website versions of this document. Thank you for bringing this to my attention. I have learned that the court reporting service failed to send an updated electronic copy to the Lab; its earlier version had not included the front matter, and this resulted in different pagination and line numbers between the electronic and hard copy versions. Please consider the hard copy version to be the designated official version at this time. The Lab has requested the updated electronic copy from the court reporting service and will update the website when this copy arrives.

Many logistical and administrative activities associated with the task force are undergoing change. The Environment, Safety & Health Division is now handling the majority of these activities, and contact designations for these will be changed. Future logistics and administrative inquiries may be directed to Dr. Ginny Lackner of the EH & S Division, via email at RELackner@lbl.gov or via telephone at 486-7413.

### **2. Subgroup Meeting Requests**

You inquired about the task force members who requested the subgroup meeting on the details of surface water and sediment sampling. Please refer to the hard copy version of the Nov. 16, 2000 meeting transcript, page 101, lines 15 - 23 for Pam Evans discussion of this meeting; page 102, lines 1 - 8, for Chris Whipple discussion of this meeting; page 103, lines 21 - 25 and page 104, lines 1 - 13 for David McGraw discussion of this meeting; and page 105, lines 14 - 25 and page 105, lines 1 - 6 for Ed Bailey discussion of this meeting. Note that these discussions concerned a meeting on sampling locations pursuant to the sampling plan, and should not be confused with other discussions, elsewhere in the transcript, concerning a meeting on the routine, ongoing, sampling program.

I recall that Pam Evans confirmed her request and interest in this subgroup meeting while at the December 13th meeting.

### **3. Member Comments**

You inquired about the location of member comments on the task force website. To date, the few received member comments have been posted to the task force website after the meeting transcripts. Please refer to the specific meetings for these entries. At one time, the website had a member comment "button." Because no member comments beyond the subject of the transcript were received, this button was eliminated due to its duplicative function with the transcript comments. If you would like to see member comments displayed in duplicate locations on the new website, please advise.
